AMMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

- 1. (Currently Amended) A process for the production of blocked polyurethane prepolymers comprising reacting
 - a) one or more diisocyanates or polyisocyanates with
 - b) one or more polyether polyols that have a content of unsaturated terminal groups of less than or equal to 0.02 meq/g of polyol, a polydispersity (PD = M_w/M_n) of [[1.1]] 1.01 to 1.5, and/or an OH functionality of greater than or equal to 1.9,

which forms an NCO-functional polyurethane prepolymer, followed by blocking of the NCO groups; with

- at least one hydrocarbon resin containing phenolic OH groups and/or an optionally substituted phenol.
- 2. (Original) Blocked polyurethane prepolymers obtained from the process according to claim 1.
- (Original) Blocked polyurethane prepolymers according to claim 2, wherein the component a) is an aromatic polyisocyanate or a mixture of aromatic polyisocyanates.
- (Currently Amended) Blocked polyurethane prepolymers according to claim 2, wherein [[t]] the component b) is a polyether polyol with a polydispersity of [[1.1]] 1.01 to 1.5 and an OH functionality of greater than 1.9 mg KOH/g.

- (Original) Blocked polyurethane prepolymers according to claim 4, wherein the component b) has an OH functionality of greater than or equal to 1.95 mg KOH/g.
- 6. (Original) Blocked polyurethane prepolymers according to claim 2, wherein the component c) are hydrocarbon resins containing phenolic OH groups and with an hydroxyl group content of 0.1 wt.% to 10 wt.%.
- 7. (Currently Amended) Blocked polyurethane prepolymers according to claim 6, wherein the component c) are liquid hydrocarbon resins at room temperature with an hydroxyl group content of 2 wt.% to 8 wt.% [[.]] based on the prepolymers.
- 8. (Original) A reactive systems comprising:
 - A) polyurethane prepolymers according to claim 2,
 - B) at least one organic amine containing at least two primary amino groups,
 - C) optionally compounds containing oxirane groups that on average contain more than one oxirane group per molecule, and
 - D) optionally catalysts and/or additives.
- 9. (Original) A method of making adhesives, sealing compositions, casting compositions, composites (fibre composite materials), moulded parts and coatings comprising mixing the blocked polyurethane prepolymers according to claim 2 into a solvent free reactive system.
- 10. (Original) A method of making anti-corrosive coatings for use in chalybeate water construction, ship building and for pipelines comprising mixing the blocked polyurethane prepolymers according to claim 2 into a solvent free reactive system.

Po-7880

- 11. (Original) Blocked polyurethane prepolymers according to claim 3, wherein the component c) are hydrocarbon resins containing phenolic OH groups and with an hydroxyl group content of 0.1 wt.% to 10 wt.%.
- 12. (Original) Blocked polyurethane prepolymers according to claim 4, wherein the component c) are hydrocarbon resins containing phenolic OH groups and with an hydroxyl group content of 0.1 wt.% to 10 wt.%.
- 13. (Original) Blocked polyurethane prepolymers according to claim 5, wherein the component c) are hydrocarbon resins containing phenolic OH groups and with an hydroxyl group content of 0.1 wt.% to 10 wt.%.
